Standard Unit

Polyurethane Air Caster Elements

To load, just push the roll onto the low-profile deck

Air Caster

Air Pallet Roll Movers

In the fast-paced world of paper manufacturing & processing, efficiency and precision are paramount. Our cutting-edge air pallet roll mover, equipped with state-of-the-art air caster technology, is the solution your production line has been waiting for.

Experience unparalleled maneuverability with our air pallet roll mover. The innovative air caster technology allows for effortless movement in any direction, ensuring that heavy rolls can be transported smoothly and accurately throughout your facility. This reduces the physical strain on your workforce, increasing safety and productivity.

Our roll mover is specifically engineered to handle the unique demands of the envelope industry. It is capable of moving large rolls of paper and other materials with ease, ensuring a continuous and uninterrupted production flow. This not only speeds up the manufacturing process but also minimizes the risk of damage to materials, thereby reducing waste and costs.

Featuring a robust design, our roll mover is built to last. It's resistant to the wear and tear of industrial environments, guaranteeing a long service life and excellent return on investment. The intuitive controls make it easy to operate, requiring minimal training for your staff.

Advantages:

Low profile • Easy to handle • no floor damage • Economical compared to overhead cranes • Flexible for a variety of applications • Omnidirectional movement • Precise positioning & maneuvering • No floor damage compared to traditional equipment • Ergonomic – super easy to move • Runs off your existing shop air supply.
